1. Statement of Origin

The Second Forest was born as a narrative experiment:
a work of speculative science fiction created to explore a single question:

"What if humanity was not the beginning of the story, but the forgotten result of a war fought long before history?"

This work was fully conceived and written by **The Architect**, including:

- the central concept

- the cosmology and mythology

- the narrative canon

- the characters

- the hybrid technology systems

- the Fractal Exoshell

- the Pact of Non-Interference

- the structure of the three human lineages

- and the final revelation that defines the universe

No part of this conceptual framework existed before this creation.

---

2. Intent of the Work

This manifesto establishes that *The Second Forest* is:

- an original work of science fiction

- with a unique conceptual DNA

- built as a standalone narrative **and** a transmedia franchise foundation
  (film, series, game, comics, VR, interactive formats)

The work does **not** aim to represent real-world political groups, religions or ideologies.
Its pillars are:

- speculative scientific reasoning

- evolutionary and psychological inquiry

- ethical paradoxes

- reinterpretation of ancient myths through fictional lenses

It is fiction.
Its function is narrative.

---
